**TO WHOM IT MAY CONCERN**

***Re: Yamarna Mapping and Stratigraphic Legend Project- Reference***

Gold Road Resources Limited engaged Principal Consultant, Dr Oliver Kreuzer, from Concept to Discovery, to establish a stratigraphic column, produce a new **Regional Geological Interpretation Map, Cross Sections and Reports** as well incorporate formal presentations and work shop discussions to transfer this new knowledge.

This major project was completed within budget and as scheduled from 24 July to 31 December 2017.

Gold Road congratulates Oliver in achieving all the required outcomes at a very high standard, with great attention to detail. This most up to date geological map and stratigraphic legend constitutes the base for all current targeting and exploration efforts in the Yamarna Belt: an outstanding result for a significant project.

It is especially appreciated that Oliver engaged with Gold Road site based geologists and contractors, combining their technical on the ground knowledge with his detailed structural and geological experience. This included a mentoring role as part of the diamond drill core logging component of the project.

It certainly would be a pleasure to use and recommend Oliver and Concept to Discovery for other geological projects in the Yamarna Belt or elsewhere.

Yours sincerely  
**Gold Road Resources Limited**

**John Donaldson**
